**Subject:** Revised notice and attachment

After the May 3rd conference call, we reviewed the fact that Tasks 2 and 4 will not be sufficiently completed before the May dates set previously. So far, the review process has been very beneficial and we appreciate all of the input that we have had thus far. The technical session #3 has been rescheduled to July 26th and 27th.

Since all 4 tasks will be addressed, the two half day sessions are still the preferred alternative. Due to people traveling into Billings, the session will run 1:30-5:00 pm on the first day followed by an 8:00 am-1:00 pm meeting the second day. This should allow plenty of time, as well as give people the opportunity to travel into and out of Billings with only a single night stay.

Revised reports for task 1 and 3 will still be sent out in late May or early June, so that people can have time to review those. Other materials will be sent out as soon as we receive it.

The purpose of the meeting is to go over the final results of Tasks 1 and 3, as well as review Tasks 2 and 4. The date and time for the meeting is shown below.

Date: July 26th and 27th, 2005  
Time: 1:30 - 5:00 pm 26th  
8:00 am - 1:00 pm 27th  
Place: Boothill Inn  
242 Airport Road  
Billings, MT 59105

Please RSVP either by email or telephone (406-656-8100) by July 20th.

The hotel has a shuttle from the Airport. We have set aside rooms on July 26th. The block of rooms is being held under HDR Engineering. The telephone number is 1-866-266-8445 for reservations.
